

Educational Performance And Resources Allocation – Task 4 Reoprt

Project Overview

The Educational Performance Dashboard is an interactive Power BI dashboard created to analyze student academic performance.

The dashboard provides insights into marks, attendance, grades, subject performance, and overall student achievement.

Dataset Information

Dataset Name: Student Performance Dataset

The dataset contains:

- Student ID
- Student Name
- Department
- Subject
- Marks
- Attendance Percentage
- Grade
- Performance Level

Tools Used

- Power BI Desktop
- Excel Dataset
- Data Analysis
- Data Visualization

Dashboard Overview

Count Of Grade Analysis

Count of Student_ID by Grade

Sum Of Marks By Subjects Analysis

Sum Of Attendance Analysis

Key Performance Indicators (KPIs)

- Average Marks
- Student Performance Analysis
- Attendance Percentage
- Grade Distribution
- Subject-wise Performance

Dashboard Analysis

Subject Performance Analysis

The dashboard compares student marks across different subjects.

Grade Distribution Analysis

The dashboard identifies student performance levels based on grades.

Attendance Analysis

Attendance percentage is analyzed to understand student participation.

Key Insights

1. The dashboard helps monitor student academic performance.
2. Subject-wise analysis identifies strong and weak areas.
3. Grade distribution provides an overview of student achievement.
4. Attendance analysis helps understand learning patterns.
5. Educational institutions can use this dashboard for better planning.

Conclusion

The Educational Performance Dashboard provides valuable insights into student marks, attendance, grades, and academic trends. It helps educational institutions analyze performance and improve decision-making through interactive Power BI reports.
